Services

Straightened and Cut Wire

Malin Company produces straightened and cut wire from .003" dia. to .187" dia. Lengths from .250" to 30ft. Length and diameter tolerances quoted upon request.

Electro Polished and Clean Wire

If your need is for brite, smooth, wire and clean wire, Malin Company can provide you with your needs. Diameters as fine as .006" to .041" dia. on spools. We will also work with customer supplied wire. The most commonly supplied wire is the 300 series of stainless steel.

Finishes

Matte, diamond drawn brite, centerless ground, and soap.

Wire Forming

Malin has also developed the ability to shape and form wire in all types of materials and configurations, no quantity is too small. Will set up and run both production and prototype quantities.

Barcoding

Wire Drawing

Malin Company can now draw aluminum, brass, copper, stainless steel, and nickel alloys. Diameters down to .0016" and up to .250" dia.. We can also draw and process customer supplied wire as well.
